Executive Director

Broward League of Cities

**RE: Broward County Solid Waste Task Force**

**The Florida Waste Haulers & Recyclers Coalition is a Non-Profit Florida Corporation consisting of local solid waste haulers, roll off companies, recyclers, Material Recovery Facilities (MRF) and recovered material dealers.**

**Some of its members also have existing disposal, recycling and transfer station facilities in Broward County, Florida, which have been identified and listed in the subcommittee reports of 2/26/2020**

**In keeping with the advocacy goals of the Broward League of Cities and its Solid Waste Task Force, we urge you to include these local waste, recycling and recovered material facilities existing in Broward County that are designed to economically serve the solid waste and recycling industry, as SWA has done in Palm Beach County.**

**We believe that these facilities should be included in the overall solid waste management plan currently under consideration by the Broward League of Cities and its members and sub-committees in their deliberations and final plan .**

**All materials that have Recycling Potential should have free flow throughout the County with the exception of MSW.**

**FLORIDA WASTE HAULERS & RECYCLERS COALITION,**
