

The “Leading ONE Broward” initiative speaks directly to every elected official, each one chosen by their communities to lead — to develop strong, thoughtful public policies, to make decisions that help our residents, and to collaborate with one another in a spirit of respect, trust, and unity.

“Leading ONE Broward” reminds us that leadership isn’t just about holding office. It’s also about holding each other accountable to a higher standard. It’s about working together to strengthen confidence in municipal governments and making the best decisions possible for residents and stakeholders. And perhaps most importantly, it’s about ensuring that when our terms of office come to an end, we, as elected officials, can say with pride that we have left our cities better than we found them.

The League will continue its progress by identifying challenges, promoting best practices, and advocating for policies that strengthen our cities and county. This is yet another opportunity to lead not just within individual municipal boundaries but as a united front across all 31 municipalities in Broward County.

Leadership requires courage, collaboration, and a deep commitment to something greater than ourselves. “Leading ONE Broward” is a call to action. Together, we will continue to trailblaze and set the standard for Florida and the nation. I encourage you to lend your voice, your vision, and your leadership to this collective effort.
